Ayus Technology Corporation  
3501 27<sup>th</sup> Street,  
Vernon, BC,  
Canada, V1T 4X1

**RE: Letter of Endorsement**

Dear Sirs:

We installed a 6" Ayus device on our main water line in 2008. The results have been positive, with no negative side effects. Our Energy costs are down and the scaling problems that we use to experience have been reduced significantly. We installed a new steamer in one of our Kitchens that in the past would require de-scaling every 6 to 8 weeks and we finally de-scaled it after a year. The Ayus device itself hasn't required any maintenance. The technology has saved us money on equipment, maintenance and energy costs related to our water and the minerals deposits from it. We have also had several guests comment that our water is so much better than anywhere else at the resort. We have a newer building attached to the hotel that doesn't have the Ayus device on the water system. After 2 years it is starting to experience calcification problems that have been greatly reduced in the main hotel. We are seriously considering recommending the installation of an Ayus device to the Strata of that building.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Doug Avery', is written over a blue horizontal line.
