GUIDING WATERCARE INNOVATION

CAP

The Coffee Assurance Package

The 'Smart' Ultrafiltration System for Foodservice Applications

The CAP is the smart solution for foodservice operators looking for ultra high purity water with smart metering capability.

The system provides premium filtration, taste and odour removal as well as scale reduction all in one efficient, compact unit that can be easily installed in the back room of restaurants where space is limited.

The CAP takes care of your beverage water so that you can take care of your customers!

The CAP Advantage:

Premium Water = Consistent Beverage Quality

- *The CAP features an Ultrafiltration membrane rated at 0.015 microns.*
- Improve taste profiles - The system removes chlorine off taste and odour.
- Reduce brewer maintenance - reducing the formation of scale means better brewer efficiency and lower cost of operation

Compact Footprint = Space Savings

- The CAP plate mount system is wall mounted and has a small footprint combining several treatment processes

Automatic Control = Peace of Mind

- Set it and forget it! The **Smart Controller** automatically controls filter operation and automatic self-cleaning.
