Specialty Harmsco Hurricane Cartridges

Specialty Harmsco Hurricane Filter Cartridges are now available in 8 different styles and in various micron ratings for different filtration applications.

Features

- High dirt holding capacity and long filtration life
- Cartridges are certified to NSF 61 Standards
- Pleated sediment cartridges for high dirt-holding capacity
- Low pressure drops compared to comparable filters

Order Guide

Cartridge Type	Features and Typical Applications	Part Number	Micron Rating
1. Pleated Polyester	The media is excellent for drinking water, beverage and industrial applications where <i>precise filtration</i> is needed. Five-micron and above can be cleaned and reused in most applications.	HC-170-0.35	0.35
		HC-170-1	1
		HC-170-5	5
		HC-170-10	10
		HC-170-20	20
		HC-170-50	50
		HC-170-10	10
		HC-170-150	150
2. Synthetic Composite	The media's patented gradient density and low resistance provide for excellent filter life while maintaining high efficiency. The media contains no binders or cellulose and have been developed <i>specifically for drinking and bottled water applications</i> .	HC-170-1W-HF	1
		HC-170-5W-HF	5
		HC-170-20W-HF	20
3. High Temperature	The media is pleated polyester and is reusable in most <i>high temperature applications</i> . Rated for temperatures to 250°F and pressures of 50 PSID	HC-170-5HT	5
		HC-170-10HT	10
		HC-170-20HT	20
		HC-170-50HT	50
4. High Temperature/ Phenolic	The media is pleated phenolic and is reusable in most applications. This cartridge is <i>strictly used for industrial applications not intended for drinking water use</i> . Rated for temperatures to 250°F and pressures of 50 PSID. This cartridge is only available in 5HT micron size.	HC-170-5CPHT	5

FEATURE SHEET

Specialty Harmsco Hurricane Cartridges

Cartridge Type	Features and Typical Applications	Part Number	Micron Rating
5. Carbon Plus 5-Micron PreFilter	For taste, odour and free chlorine removal. High carbon content for extended throughput. Outer wrap of pleated five micron Polyester-Plus filter media to protect the carbon by removing sediment and extend filter life. <i>Not recommended in drinking water applications where water is not microbiologically safe.</i>	HC-170-AC-5	5
6. Antimicrobial Media	This pleated media utilizes Silver Zeolite technology. Combining inert organic materials with silver into the filter media enables the cartridge to <i>reduce odour-causing bacteria and inhibit the growth of destructive mold and mildew</i> on the filter cartridge.	HC-170-20-AM HC-170-50-AM	20 50
7. EZ Clean	The media is pleated polyester and is cleanable and reusable in most applications. This cartridge has a nominal 50-micron rating. Ideal use would be where multiple cartridge cleanings is favourable, such as <i>Cooling Towers, Chillers, Heating and Boiler Water Filtration.</i>	HC-170-EZ-CLEAN	50
8. Poly Mesh Media	This media is pleated polypropylene and is excellent where multiple cartridge cleaning may apply. This cartridge has a nominal 250 micron rating. Ideal applications where <i>coarse filtration</i> is present.	HC-170-PM	250

Harmsco Hurricane Filters are certified to ANSI-NSF 61 Standards.
