

PR HIGHLIGHT

GREEN BUILDER MAGAZINE

EDITOR'S CHOICE - THE HOT 50 PRODUCTS OF 2010

“Water filters work. I like this kitchen model especially because it’s relatively simple and removes all of the major water impurities you might worry about (including the ones that affect taste.)”

DATE

February 2010

PRODUCT

PBS-400 Prep Sink and Wet Bar Water Filtration System

AUDIENCE

262,500 building professionals

SYNOPSIS

Everpure has been the recipient of many awards and accolades given by top editors, bloggers and industry gurus but, this latest award is the greenest one yet! The PBS-400 Prep Sink and Wet Bar Water Filtration System by Everpure has been named one of the **Hot 50 Products of 2010 by Green Builder magazine**. The magazine’s editors compiled the list of top products from their extensive research at the 2010 International Builder’s Show. The PBS-400 was included in the list of leading products because it is significant in the development of an eco-conscious home that is intentionally more energy-efficient, durable and self-sufficient.

PROFILE

Green Builder® magazine is the fastest growing publication in the residential building industry and the only monthly magazine to focus exclusively on sustainable, energy-efficient, healthy, and environmentally sound construction techniques. Green Builder offers practical, cost-effective information to a community of the most active building professionals across the country. The magazine’s nationally award-winning editorial team blends top-quality visionary content with sophisticated design to generate an unforgettable publication that addresses key issues of our time.
