FEATURES • BENEFITS

One system provides premium quality water to high flow fountain, coffee and ice machines

Proprietary Everpure Micro-Pure® II filtration media effectively inhibits the growth of bacteria on the filter media that can decrease product life

Exclusive precoat filtration provides superior chlorine taste & odor reduction and micro-filters dirt and particles as small as 0.5 micron in size by mechanical means

Ideal where extreme water conditions demand larger capacity filters and surge tank to meet peak demand flow requirements

Sanitary cartridge replacement is simple
Two (2) mounted SR-X systems with SS-IMF cartridges inhibits limescale buildup in ice machines and coffee brewers

20" prefilter captures larger dirt particles
NSF/ANSI Standard 53 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating.

Use 3/4" water line.

Fountain equipment connections are made to the outlet part of the system before the SR-X system.

Coffee brewer and ice machine connections are made after the SR-X feeder; a tee is required.

Install vertically with cartridges hanging down and allow 2½" (6.35 cm) clearance below the cartridge for easy cartridge replacement.

Flush cartridges by running water through system for five (5) minutes at full flow.

OPERATION TIPS

Change cartridges on a regular six (6) month preventative maintenance program.

Change cartridges when capacity is reached or when pressure falls below 10 psi (0.7 bar).

Change SS-IMF cartridge before Hydroblend™ compound is completely used up.

Change prefilter cartridge when excessively dirty Always flush the filter cartridge at time of installation and cartridge change.
