

RIGHT-SIZED REVERSE OSMOSIS SOLUTIONS FROM 15-600 GALLONS PER DAY

SYSTEMS UP TO 350 GPD

- For a fresh, clean, pure back of house water source
- Improves equipment life and performance by removing 90%+ of all dissolved solids that cause scale buildup
- Protects against taste- and odor-causing contaminants while removing dirt, particulates and dissolved minerals
- Reduces limescale buildup that can cause excessive machine downtime and increased maintenance costs
- Reduces energy costs caused by scale buildup on equipment heating elements and boilers
- LVRO is a low volume RO that provides a more environmentally friendly solution
- CC models introduce a small amount of hardness minerals back into the treated water
- BL Series systems feature an adjustable blend valve which allows for custom tailoring of the dissolved mineral content in the treated water
- Controlled remineralization using the CC Cartridge, or blending, is desirable for coffee that requires some hardness for proper extraction, and for tea brewing for the proper release of flavonoids

UP TO 15 GPD

LVRO-75HE

UP TO 100 & 225 GPD

MRS-100 & MRS-225 (plus CC & BL)

Order tank separately.

Note:
CC model includes calcite feeder cartridge which adds minerals back into water.

UP TO 350 GPD

MRS-350 (plus CC & BL)

Shown with optional prefilter; order tank separately.

Note:
CC model includes calcite feeder cartridge which adds minerals back into water;
BL model includes blend valve and submicron filter**† cartridge which allows setting a blend of filtered and RO water.

NOTE: Replacement cartridges can be found on page 54 of the 2106 Foodservice catalog. All powered models available in 230 and 240 VAC. Contact Pentair® Everpure for details.

Optional 10" Prefilter Kit*	EV9795-81	Adds 5.5" to width	Adds 14.0 cm to width	5.0	2.3

*Not shown.

**By mechanical means.

†See individual system specification sheets for performance claims and FIFRA registration information.

HIGH CAPACITY SYSTEMS UP TO 600 GPD

High output/high efficiency configurable reverse osmosis systems rated at 600 gallons [2,271 L] per day nominal. Depending on model selected, delivers reverse osmosis and/or

blended filtered water for multiple foodservice applications. For use with coffee brewers, espresso machines, steamers, combi ovens and ice machines. Also ideal for specialty coffee.

UP TO 600 GPD

MRS-600HE*

UP TO 600 GPD

*Prefiltration not included. Additional equipment may be needed unless prefiltration is already installed.
NOTE: Replacement cartridges can be found on page 54 of the 2106 Foodservice catalog.

RO SOLUTIONS CAN BE GREENER WITH EVERPURE® MRS-600 SYSTEMS BY PENTAIR

Water Savings per Gallon of RO Water Used

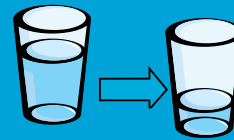

Conventional RO

For every 1 gallon of RO water used, 4 gallons of water goes to drain as waste.

Everpure MRS-600 Systems

For every 1 gallon of RO water used, 1/4 gallon of water goes to drain as waste.

80% savings with this system over traditional ROs
